

# Pumpkin Garland

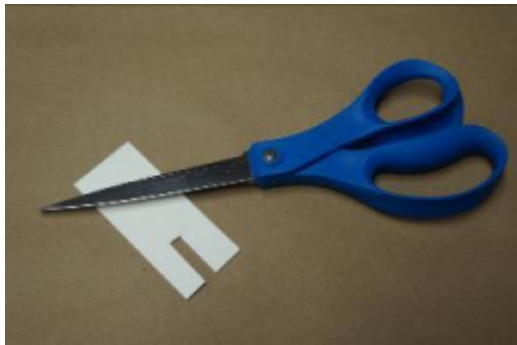

## Supplies

**Included :** Four lengths of orange yarn, approximately 28 feet long, one length of brown yarn, approximately 3.5 feet long, 2 green pipe cleaners, one piece of cardboard

**Not Included:** Scissors

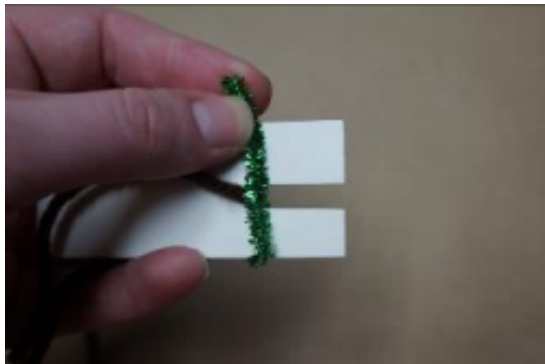

1. Cut a slit about one inch deep and a quarter inch wide in your cardboard.

2. Grab your brown yarn, this will serve as the backbone of the garland.
3. Thread the brown yarn through the slit in the cardboard, about six inches from the left end of the brown yarn.

4. Cut one pipe cleaner into four (4) 2 inch (2") pieces. The second pipe cleaner is provided as a back up, should you need more to cut. Keeping the brown yarn between the cardboard slit, place one pipe cleaner perpendicular to the slit. Hold in place.

5. Wrap your first length of orange yarn around the cardboard.

6. While the orange yarn is wrapped around the cardboard, use the brown yarn to tie the pom-pom tightly around the middle.

7. Slide the yarn off the cardboard. Turn the pom-pom over, and tie another, even tighter knot on the other side of the pom-pom in relation to your last knot.

8. Cut the looped ends with sharp scissors. Take care to not cut the brown yarn or pipe cleaner.

9. The pom-pom will come out looking shaggy and uneven. Trim your pom-pom for an even, fluffy look. Below is a before and after photo.

10. Repeat steps three (3) through nine (9) until you have four pom-poms on your garland. Leave approximately six inches between each pom-pom.

11. To finish, tie loops on both ends of the brown yarn for easy hanging!
